## Alternative performance measures

SpareBank 1 Østlandet's alternative performance measures (APMs) have been prepared in accordance with the ESMA guidelines on APMs and are indicators aimed at providing useful additional information to the financial statements. These performance measures are either adjusted indicators or measures that are not defined under IFRS or any other legislation and may not be directly comparable with the corresponding measures from other companies. The APMs are not intended to be a substitute for accounting figures drawn up according to IFRS and should not be given more emphasis than these accounting figures, but they have been included in financial reporting to give a fuller description of the Bank's performance. The APMs also represent important metrics for how the management is running the business.

Non-financial indicators and financial ratios defined by IFRS or other legislation are not defined as APMs. SpareBank 1 Østlandet's APMs are used both in the overview of main figures and in the directors' report, and in results presentations and prospectuses. All APMs are shown with corresponding comparative figures for previous periods.

Lending and deposit margins for the parent bank are calculated in relation to the daily average of loans to and deposits from customers. For all other main figures and APMs that are calculated using average balances, the average balance is calculated as the average of the opening balance for the current period and the closing balance for each of the quarters in the period.

Alternative performance measures	Definition and rationale
Profit after tax incl. interest hybrid capital	Profit after tax - Interest expenses on hybrid capital
	The key figure shows Result after tax adjusted for interest on hybrid capital. Hybrid capital is according to IFRS classified as equity and interest expences are booked as an equity transaction. Hybrid capital has many similarities with debt items and differs from other equity in that it is interest-bearing and is not entitled to dividend payments. The key figure shows what profit after tax would have been if the interest expenses related to the hybrid capital had been recognized in the income statement.
	$rac{(Profit\ after\ tax-Interest\ expenses\ on\ hybrid\ capital) imes rac{Act}{Act})}{Average\ equity-Average\ hybrid\ capital}$
Return on equity capital	The return on equity after tax is one of SpareBank 1 Østlandet's most important financial measures and provides relevant information about the company's profitability in that it measures the company's profitability in relation to the capital invested in the business. The result is corrected for interest on hybrid capital, which is classified as equity under IFRS, but which it is more natural in this context to treat as debt, as hybrid capital is interest-bearing and is not entitled to dividend payments.
	Operating profit after losses on loans and guarantees —Net income from financial assets and liabilities — Notable items
Result from core operations	Result from core operations provides relevant information about the profitability of the Bank's core business.
	<u>Total operating costs</u> Total net income
Cost-income-ratio	This indicator provides information about the relationship between revenue and costs, and is a useful measure to assess the cost-effectiveness of the enterprise. It is calculated as total operating costs divided by total revenue.
Lending margin	Weighted average interest rate on lending to customers and loans transferred to covered bond companies — Average NIBOR 3 MND
	The loan margin is calculated for the retail and corporate market divisions and provides information on the profitability of the divisions' lending activities. Loans transferred to covered bond companies are included in the selection as they are included in the total lending activity.

Alternative performance measures	Definition and rationale
	Average NIBOR 3 MND — Weighted average interest rate on deposits from customers
Deposit margin	The deposit margin is calculated for the retail and corporate market divisions and provides information on the profitability of the divisions' deposit activities.
	Lending margin + Deposit margin
Net interest margin	The net interest margin is calculated for the retail and corporate market divisions and provides information on the profitability of the divisions' overall lending and deposit activities. Loans transferred to covered bond companies are included in the selection as they are included in the total lending activity.
Net interest income inclusive of	Net interest income + Commissions from loans and credit transferred to covered bond companies
commissions from covered bond companies	Loans transferred to covered bond companies are part of total lending, but the income and expenses associated with these loans are recognised as commission income. The indicator is presented because it gives a good impression of net income from the overall lending and deposit activities.
Total assets	Total Assets
rour asses	Total assets is an established industry-specific name for all assets
	Total assets + Loans transferred to covered bond companies
Adjusted total assets	Total assets is an established industry-specific name for all assets plus loans transferred to covered bond companies included in the lending business.
Gross loans to customers including	Loans to and receivables from customers + Loans transferred to covered bond companies
loans transferred to covered bond companies	Loans transferred to covered bond companies are subtracted from the balance sheet, but are included in the total lending business.
	Deposit from and liabilities to customers  Gross loans to customers
Deposit to loan ratio	The deposit coverage ratio provides relevant information about SpareBank 1 Østlandet's financing mix. Deposits from customers are an important means of financing the Bank's lending business and the indicator provides important information about the Bank's dependence on market financing.
	Deposit from and liabilities to customers
Denocit to lean watin including leans	Gross loans to customers + Loans transferred to covered bond companies
Deposit to loan ratio including loans transferred to covered bond companies	The deposit coverage ratio provides information about the financing mix in the overall lending business. Deposits from customers are an important means of financing the Bank's lending business and the indicator provides important information about the dependence of the overall lending business on market financing.
Growth in loans during the last 12 months	$rac{Gross\ loans\ to\ customers}{Gross\ loans\ to\ customers\ 12\ months\ ago}-1$
	This indicator provides information about activity and growth in the Bank's lending activity.
Growth in loans including loans	$\frac{\textit{Gross loans to customers} + \textit{Loans transferred to CB}}{\textit{Gross loans to customers } 12 \textit{ months } \textit{ago} + \textit{Loans transferred to CB } 12 \textit{ months } \textit{ago}} - 1$
transferred to covered bond companies (CB) in the last 12 months	This indicator provides information about activity and growth in the Bank's total lending activity. The Bank uses the covered bond companies as a source of funding, and the indicator includes loans transferred to the covered bond companies to highlight the activity and growth in overall lending including these loans.

Alternative performance measures	Definition and rationale
	$rac{Deposits\ from\ and\ liabilities\ to\ customers}{Deposits\ from\ and\ liabilities\ to\ customers\ 12\ months\ ago}-1$
Growth in deposits in the last 12 months	This indicator provides information about the activity and growth of the depositing business which is an important part of financing the Bank's lending activity.
Impairment on loans as a percentage	$\frac{(\textit{Losses on loans and guarantees}) \times (\frac{\textit{Act}}{\textit{Act}})}{\textit{Gross loans to customers}}$
of gross loans	The indicator shows the impairment loss in relation to gross lending and provides relevant information about the company's impairment losses in relation to lending volume. This provides useful additional information to the recognised impairment losses as the cost is also viewed in the context of lending volume and is thus better suited for comparison with other
Loans to and receivables from customers in stage 2, percentage of	(Loans to and receivables from customers in stage 2)  Gross loans to customers
gross loans	The indicator provides relevant information about the Bank's credit risk and is considered as useful additional information to the notes on losses.
Loans to and receivables from	(Loans to and receivables from customers in stage 3)  Gross loans to customers
customers in stage 3, percentage of gross loans	The indicator provides relevant information about the Bank's credit risk and is considered as useful additional information to the notes on losses.
Commitments in default as percentage	Gross defaulted commitments for more than 90 days Gross loans to customers
of gross loans	The indicator provides relevant information about the Bank's credit risk and is considered as useful additional information to the notes on losses.
Other doubtful commitments as	Gross doubtful commitments not in default Gross loans to customers
percentage of gross loans	The indicator provides relevant information about the Bank's credit risk and is considered as useful additional information to the notes on losses.
Net commitments in default and other	Net defaulted commitments + Net doubtful commitments Gross loans to customers
doubtful commitments in percentage of gross loans	The indicator provides relevant information about the Bank's credit risk and is considered as useful additional information to the notes on losses.
Loan loss impairment ratio for	Individual write downs on defaulted commitments Gross defaulted commitments for more than 90 days
defaulted commitments	The indicator provides relevant information about the Bank's credit risk and is considered as useful additional information to the notes on losses.
Loan loss impairment ratio for doubtful	Individual write downs on doubtful commitments  Gross doubtful commitments not in default
commitments	The indicator provides relevant information about the Bank's credit risk and is considered as useful additional information to the notes on losses.
	<u>Total equity capital</u> Total assets
Equity ratio	The indicator provides information about the company's unweighted solvency ratio.

Alternative performance measures	Definition and rationale
	$\frac{(Total\ EC\ - \textit{Minority interest}\ - \textit{Hybrid capital}) \times \text{EC certificate ratio}}{\text{Number of Equity certificates issued}}$
Book equity per EC	The indicator provides information about the value of the book equity per equity certificate.  This allows the reader to assess the reasonableness of the quoted price for the equity certificate. It is calculated as the equity certificate holders' share of the equity at the end of the period divided by the number of equity certificates.
	$\frac{\textit{Listed price of EC}}{\textit{Earnings per EC} \times (\frac{\textit{Act}}{\textit{Act}})}$
Price/Earnings per EC	The indicator provides information on earnings per equity certificate against the exchange price on the relevant date, helping to assess the reasonableness of the price for the equity certificate. It is calculated as the price per equity certificate divided by annualised earnings per equity certificate.
Price/book equity	Listed price of EC  Book equity per EC  The indicator provides information about the book value of the equity per equity certificate against the price at any given time. This allows the reader to assess the reasonableness of the quoted price for the equity certificate. It is calculated as the price per equity certificate
	divided by book equity per equity certificate (see definition of this measure above).  Average amount on loans to customers  Average market value of asset encumbrance
Average LTV (Loan to value)	The indicator provides information about the loan-to-value ratio in the lending portfolio and is relevant for assessing risk of loss in the lending portfolio.
Loans transferred to covered bond (CB) companies	Loans transferred to SpareBank 1 Boligkreditt AS og SpareBank 1 Næringskreditt AS and thus derecognised from the balance sheet
	Loans transferred to covered bond companies are subtracted from the balance sheet, but are included in the total lending business. The indicator is used in calculating other APMs.
Act/Act	Total number of days in the year (365 or 366)  Number of days so far this year
Act/Act	Act/Act is used to annualise the results figures included in the indicators. Results figures are annualised in the indicators to make them comparable with figures for other periods.
Notable items	Identified costs considered to be non recurring
Notable items	The indicator is used to calculate the underlying banking activity, which is shown as a separate APM.
	Majority interest of the Group's profit after tax $\times$ Average ECC ratio  Average number of ECC i the accounting period
Earnings per average equity certificate	The indicator shows the equity capital certificate holders' share of profit after tax distributed by average number of equity capital certificates during the accounting period.
Diluted earnings per average equity	$\frac{\textit{Majority interest of the Group's profit after tax} \times \textit{Average ECC ratio}}{\textit{Average number of ECC in the accounting period} + \textit{Number of ECC issued after the accounting period}}$
certificate	The indicator shows the equity capital certificate holders' share of profit after tax distributed by the sum of average number of equity capital certificates during the accounting period and the number of equity capital certificates issued after the accounting period.
Total appraise suppress before	Total operating expenses — Restructuring costs
Total operating expenses before restructuring costs	Restructuring costs in connection with reorganization of the business are included in total operating expenses, but these costs are excluded when the business sets targets for growth in operating expenses. These costs are kept out of line for growth figures to be comparable over time. The key figure is presented as it provides a good basis for calculating underlying growth in expenses.
